

# Catalogue Web App

*COMP4952*

*Calvin & Joel*

*October 4th, 2015*

Student Task Analysis				
Sub Tasks	I want to access the Catalogue website	I want to create a catalogue	I want to create items for my catalogue	When I login I would like to be displayed the assignments I have to do ordered from closest due date to furthest
Scenario	I have assignments that I have to complete under a certain deadline and I want to access the website to keep track of my assignments.	I want to create a catalogue for each of my respective courses	I want to create assignments that I have to do under catalogues of their respective courses	I want to see what assignments I have to finish before they are due
Consideration / Influences	Can I use any web-browsers? Does it require high-speed internet? Do I need any java or flash installed on my laptop?	What do I need to know about the catalogue? How do I want to remind me of my courses?	I need to know when my assignment is due, and when should I be reminded about my assignment.	So I can crunch my assignments
Pain-Point	URL must be easy to remember. I don't want to keep asking my friends or google the URL	I hope its not too complicated to use	I have to consider how much information I need to put down for my item	Crunching assignments is stressful
Functionality		1.1 Put cursor on "Create Catalogue" 1.2 Fill in the required fields 1.3 Click "Confirm" to create the catalogue	1.1 Put cursor on "Create Catalogue Item" 1.2 Fill in the required fields 1.3 Click "Confirm" to create the catalogue item	N/A
